# Wet Blast Support Services

Vapormatt offer a comprehensive source of compatible spare parts for all competitors machinery.

Our nationwide team of specialist Wet Blast Support Engineers can provide emergency breakdown cover, scheduled maintenance and technical advice. Boost your wet blasting machines productivity and lower your operating costs by consulting our experts who can recommend a range of pump, hose, blast gun and nozzle upgrades or use of modern alternative processing abrasives.

A series of standard machine upgrades for all brands of equipment are available to increase production output, eliminate any pump and machine blocking problems and reduce equipment downtime. We are committed to bring your equipment up to modern environmental standards for liquid effluent control and ventilation discharges. Custom machine upgrades are also offered.

Telephone our WBSS desk today where our staff will be only too pleased to assist. One number for spare parts, service, abrasives, and additives for all wet blasting machines.

Wet Blast Spare Parts and Abrasives Available Ex-Stock.

On-line catalogue available at [www.vapormatt.com/spares.htm](http://www.vapormatt.com/spares.htm)

Comprehensive online wet blast spare parts catalogue available at [www.vapormatt.com/spares.htm](http://www.vapormatt.com/spares.htm)

The Vapormatt Health Check is a free initiative whereby one of our qualified engineers will visit your company and survey your wet blast machinery. A detailed analysis will then be provided with no obligation to undertake any of the the recommendations. Allow us to present our service and parts expertise as leaders in our field.
